LESSON PLAN

Week

1

Ending

11-09-2026

Subject

ICT

Class

Basic 7

Class Size

11

Strand

Introduction to Computing

Sub-Strand

Components of Computers and Computer Systems

Content Standard

B7.1.1.1 B7.1.1.1

Learning Indicator

B7.1.1.1.1

Performance Indicator

Learners can explore and talk about Components of Computers and Computer Systems

Core Competencies

Communication and Collaboration

Key Words

components, computers, computer

Through line

God's Story

Deep Hope

Storyline

PHASE / DURATION

LEARNER ACTIVITIES

RESOURCES

PHASE 1

(STARTER)

- This lesson builds on 'Components of Computers and Computer Systems' and moves the class on to Components of Computers and Computer Systems

PHASE 2

(MAIN)

- Watch and listen carefully - then describe each step of Components of Computers and Computer Systems in your own words - Complete the task for Components of Computers and Computer Systems on your own and check your work before you finish - Acceptance main learning 1790563179552 - Learners practise Components of Computers and Computer Systems in small groups taking turns - or on paper/board using the same steps where devices are shared - Learners complete a short task applying Components of Computers and Computer Systems on their own and troubleshoot one common problem

- Processor - transistor - Personal Computer - Motherboard

PHASE / DURATION

LEARNER ACTIVITIES

RESOURCES

PHASE 3

(PLENARY / REFLECTION)

- Review the steps for Components of Computers and Computer Systems - discuss the common problem met and how it was solved - and link to everyday technology. Preview the next lesson ('Components of Computers and Computer Systems')

EVALUATION

Observe learners performing Components of Computers and Computer Systems against a steps checklist, or mark a paper-based version where devices are not available. Assessment mode: Oral questions and observation of participation.

RESOURCES

PHASE 1

(STARTER)

- This lesson builds on 'Components of Computers and Computer Systems' and moves the class on to Components of Computers and Computer Systems

PHASE 2

(MAIN)

- Watch and listen carefully - then describe each step of Components of Computers and Computer Systems in your own words - Complete the task for Components of Computers and Computer Systems on your own and check your work before you finish - Demonstrate the concept or steps for Components of Computers and Computer Systems. Use the board or an unplugged model if there are not enough devices for everyone - Learners practise Components of Computers and Computer Systems in small groups taking turns - or on paper/board using the same steps where devices are shared - Learners complete a short task applying Components of Computers and Computer Systems on their own and troubleshoot one common problem

- light pen - Touchscreen - and mouse - keyboard - Personal Computer

PHASE / DURATION

LEARNER ACTIVITIES

RESOURCES

PHASE 3

(PLENARY / REFLECTION)

- Review the steps for Components of Computers and Computer Systems - discuss the common problem met and how it was solved - and link to everyday technology. Preview the next lesson ('Components of Computers and Computer Systems')

EVALUATION

Observe learners performing Components of Computers and Computer Systems against a steps checklist, or mark a paper-based version where devices are not available. Assessment mode: Oral questions and observation of participation.
